

MiSensors *Wired LTE*

MiSensors is a remote monitoring solution for capturing and analyzing sensor data, bringing full visibility into any industry. MiSensors wired LTE solution is purpose built for temperature monitoring in walk-in refrigerators and glycol chillers. Our real-time alert-based notifications provide instant visibility on the operation of equipment in your business.

Our Platform

Features

- LTE CAT 1 (B4, B13 or B2, B4, B5, B12)
- Two industrial 9.5" temperature probes
- 1000 maH back-up battery (6 months)
- GPS location based services
- IP 66 rated NEMA enclosure
- External power interrupt alerts
- Mount and Monitor

Benefits

- Latest 4G cellular technology
- Alert notifications via Email or SMS
- Automated record keeping for temperature measurements
- Cloud based portal
- Sell handsets by leading with solutions

Use Cases

- Walk-in Refrigerators
- Glycol Chillers

Mobile Applications Available:

Available Nov. 2017
