

This is a remote temperature monitoring solution for capturing and analyzing sensor data, bringing full visibility into any industry. This temperature monitoring solution is purpose built for temperature monitoring walk-in refrigerators and glycol chillers. Our real-time alert-based notifications provide instant visibility on the operation of equipment in your business.

Our Platform

Features

- Temperature Monitoring
 - Up to 8 Individual Zones with Additional Probes
- LTE CAT 1 (B4, B13 or B2, B4, B5, B12)
- Two industrial 9'5" temperature probes
- Back-up battery
- GPS location based services
- External power interrupt alerts
- Mount and Monitor

Benefits

- Latest 4G cellular technology
- Alert notifications via Email or SMS
- Automated record keeping for temperature measurements
- Cloud based portal

Use Cases

- Walk-in Refrigerators
- Glycol Chillers
